"Education is foundation upon which we build our future" So we are always concerned about their education. We try to provide them a proper environment to study well and counsel them to be better students. We are really happy with what they are achieving in their schools and exams as a result of their full efforts. Every evening study time is fixed. Regarding health :

“Health is wealth”. So we are always concerned about the health of the kids here in DRC, and with their regular health check ups and the physiotherapy 2 hours each day all the children are in a very good health. We are always teaching them about health and hygiene its benefits and encouraging them to keep the surroundings and rooms clean. Food is more important than anything so we provide them healthy and home made food than junk food.

Computer Classes for the kids and the sewing training:

The kids are attending computer classes in public holidays to practice what they had learned in school. Also sometimes on Saturdays they enjoy using the computers for 2/3 hours. Every day around 14/15 women come to take part in the sewing classes.

*In order to help needy women to improve their skills and to help them for being independent DRC runs everyday two hours sewing training by a experienced trainer. This skills will help them to get employment for a better living ahead. It is a pleasure to see what they are achieving. Every year DRC,Nepal provide certificate to our trainee after they complete their 1 year training. Similarly this year also DRC,Nepal provided a certificate of vocational skill development to all the trainee on the AGM 2075 program. We would like to thank **Sponsor Trek Nepal** for providing this great opportunity.*
